

Kriti Thakur

Technical Program Manager | PMP, PMI-ACP, SAFe, CSM, ServiceNow CSA, PMI Gen AI

 thakur.kr141@gmail.com  6288668615  Fairfax, VA, US | Open to Relocate  linkedin.com/in/kritithakur/

With 8+ years leading technical programs across cloud services and enterprise software, I've delivered complex cross-functional initiatives using Agile methodologies that increased operational efficiency by 30%. I excel at managing stakeholder alignment between product, engineering, and business teams while driving technical decision-making across multiple workstreams. My expertise includes establishing standardized project frameworks, implementing process improvements, and utilizing metrics-driven program management to ensure high success rates and on-time delivery. I combine technical acumen with strategic planning to consistently deliver high-impact solutions that accelerate business growth while maintaining quality standards.

Professional Experience

CVS Health - Welldoc/Aspire

Technical Program Manager, Healthcare SaaS Platform - BlueStar

Jan 2024 – Present | Columbia, MD, USA

- Led cross-functional technical initiative and process improvements to modernize healthcare applications with a \$25M budget, coordinating 5 engineering teams across 3 time zones and delivering 100% of critical requirements on schedule.
- Led change management efforts as part of a strategic initiative to enhance product impact by building 3 new features and improving data delivery processes, reducing processing time by 80% while maintaining HIPAA compliance standards
- Identified customer challenges through comprehensive stakeholder interviews and communicated insights to cross-functional ML, DevOps, and Product teams, leading to Gen-AI reporting service with 10K adoptions in 2 months.
- Established a standardized project governance framework using Smartsheet, resulting in a 30% reduction in timeline overruns and improved stakeholder visibility across 4 concurrent projects.
- Implemented Agile methodology across previously siloed technical teams using Jira & Confluence, increasing sprint velocity by 35% and improving cross-team collaboration.

Acxiom

Technical Program Manager, Co-Op

Feb 2023 – Jul 2023 | Arlington, VA, USA

- Orchestrated biweekly program alignment meetings between engineering, security, CRM, and sales & marketing stakeholders, implementing structured agendas that reduced scope issues by 30%.
- Designed 4 unified JIRA dashboards with dependency management frameworks and resource allocation tracking on MS Project, enabling teams to identify bottlenecks, improving project completion rates by more than 20%, and enhancing visibility into critical path items.
- Led complex Azure Databricks Cloud migration initiative, and collaborated with cross-functional teams to reduce data analytics delivery time by 80% while ensuring security compliance.
- Developed comprehensive technical documentation and status reporting templates on Confluence, creating scalable program management assets that improved team knowledge transfer.

Akamai Technologies

Technical Program Manager, Software Releases

Sep 2020 – Jan 2022 | Bengaluru, India

- Directed enterprise-wide CDN platform release strategy across 4 global SAFe teams (60+ technical contributors), orchestrating 8 major software deployments with 97% on-time delivery and 10% increased velocity.
- Implemented release management modernization initiative using JIRA, reducing technical delivery cycle time by 30% and improving defect resolution by 45%.
- Documented project status and created data reports in Tableau to present in quarterly reviews to the VP of Engineering and leadership, showcasing business-related achievements and progression to secure executive support for the team.
- Led Machine Learning project for Bad Network Spot classification, managing analytics & AI teams from requirements to delivery. Aligned Data Scientists and Network Engineers to develop models with 85% accuracy, boosting utilization by 20%.

Wipro Technologies

Technology Consultant - Scrum Master

Dec 2017 – Sep 2020 | Bengaluru, India

- Coached Waterfall teams through Agile transformation using structured mentoring programs and hands-on training, resulting in a 30% increase in team throughput and accelerated backlog resolution.
- Demonstrated servant leadership by fostering collaboration within a 20-member development team; facilitated Scrum ceremonies: Sprint Planning, Daily Stand-ups, Backlog Grooming, Reviews, & Retrospectives to ensure smooth Agile delivery & continuous improvement.

Software Engineer

Aug 2016 – Dec 2017 | Bengaluru, India

- Developed custom SOAR playbooks and Python scripts in Palo Alto Demisto to automate alert triage and threat enrichment, reducing manual response efforts by 30%.
- Led the implementation of SOAR across 12 security workflows aligned with the NIST Cybersecurity Framework, improving incident handling and reducing SLA breaches by 25%.

Software Engineer Trainee

Jan 2016 – Jul 2016 | Noida, India

- Completed programming modules to gain hands-on experience in Software Engineering, CI/CD pipelines, Agile/Waterfall methodologies, DBMS, Git version control - GitHub, and API integration.
- Collaborated with senior developers on coding, testing, and debugging applications to enhance technical skills in the software development lifecycle and DevOps practices.

Skills

Program/Project Management: Agile & SAFe Methodologies, Cross-functional Team Leadership, Stakeholder Management & Alignment, Risk & Dependency Management, Resource Planning & Allocation, Process Improvement & Optimization, Roadmap Planning & Prioritization, Strategic Decision-making, Budget Management & Forecasting, Change Management, Business Requirements Analysis, Operational Excellence

Tools: JIRA & Confluence, Salesforce & SalesLoft, Microsoft Project & Visio, Asana & Smartsheet, ServiceNow, Lucidchart, Rally & Azure DevOps, PowerBI & Analytics Tools, GitHub, SharePoint, Agile Project Management Tools, Documentation & Reporting Platforms

Technical Skills: Software Development Lifecycle, Cloud Architecture (Azure, AWS), API Integrations, CI/CD Pipeline Management, Data Analysis & Visualization, Machine Learning/AI Implementation, Technical Documentation, SQL & Database Management, Release Management, Technical Requirements Gathering, Security & Compliance (HIPAA), DevOps Practices, Healthcare Technology Systems

Education

Master of Science - Project Management, Northeastern University

Boston, MA, USA

Major: Agile Project Management | Project Lifecycle Management, Lean Product Development, Remote Team Management, Project Portfolio Management, Program Management Office

Bachelors of Technology - Computer Science and Engineering, IIIT

Noida, India

Software Engineering, Computer Programming, DBMS, Data Mining, Presentation and Communication Skills...

AI for Business & Business Administration, The Wharton School, University of Pennsylvania [E-Learning]

Arlington, VA, USA

Product Management, Generative AI for Business, LLM based Products, Business Transformation with AI, usiness Operations, Operations Management, Financial Accounting, Business Strategic Analytics, Managing Social and Human Capital, Team management

Volunteer Experience

Technical Program Manager, Association for Computing Machinery (ACM)

Sep 2022 – Sep 2024 | Sacramento, CA, USA

- Delivered public presentations on cutting-edge AI, IoT, and Cybersecurity, Quantum AI, topics at ACM's 5th Future World Symposium. Effectively communicated complex technical concepts to an audience of 500+ students and professionals,

- Co-anchored the 2-day symposium, facilitating insightful discussions on AI & IoT with diverse international teams, fostering a global knowledge-sharing environment

- Mentored 2 junior program managers in symposium organization, covering event planning, stakeholder management, and risk mitigation, resulting in seamless execution of 5 parallel tracks

- Spearheaded targeted marketing campaigns, leveraging social media and campus outreach, increasing student registrations by 30% compared to the previous year
